

Environmental policy

Saimaan Eristys Oy takes the health of our environment into consideration in every aspect of its operations.

We comply with all applicable legislation, regulations and our own requirements, and we monitor their development.

We provide stakeholders with information on our environmental management and take their feedback into consideration.

We minimise the environmental impact of our operations by favouring solutions which save on natural resources whenever it is financially and technically possible.

We contribute to the development of our customers' own environmental management. We enhance our competitiveness by understanding the demands and expectations of our customers and other stakeholders.

We encourage, train and guide our personnel to take the environment, health and safety into consideration in every phase of work.

We develop our operations and processes to make more effective use of natural and other resources.

Saimaan Eristys Oy
